

# MD FAIYAZ ANSARI

B. Tech (Electronics & Communication Engineering)

Email: mdfaiyazansari1@gmail.com

Mobile No.: +91-9521383047

I am a developer. My objectives are to emphasize to create, develop, and redevelop a website by applying the most up-to-date technologies. Come with both core and non-core domains, am adept to apply

**JavaScript** Full Stack development, and am knowledgeable about **OPPs** in **C++**.

I would like to work on real-world projects as a **Front-end** and **Back-end** developer.

## Academic Qualification:

Degree/Board	Percentage/CPI	Year of Passing
<b>B. Tech (Electronic &amp; Comm. Engineering)</b> University Institute of Engineering & Technology, Maharshi Dayanand University, Rohtak	6.66/10	2021
<b>Intermediate</b> State Board of Uttar Pradesh	75/100	2015
<b>High School</b> CBSE Board	8.40/10	2013

## Technical skills:

- **Programming Languages:** C/C++, JavaScript
- **Markup languages:** HTML5, CSS3
- **Framework:** Bootstrap 5.0

## Project:

- **Front-end web development:**
  - Individually work experience to build a **web** pages portfolio by using **HTML5** and **CSS3** technologies,
  - Implemented **JavaScript** and **Bootstrap** framework to build more creative and beautiful e-commerce websites like navigation, buttons, typography, forms, and other interface.
- **Motion detector system:**
  - The focus of this project is to embed and optimize electronic components like (transistor, diodes), sensor (IR), IC (LM538 & CD4017) and so on that the result of this circuit matches our purpose,
  - The objective was to save power consumption, security and avoid unnecessary data (video recorded) storing in memory with the help of a microcontroller and camera.

## Internship:

- **Internet of Things (IoT):**
  - Build temperature, light and alert controlling system, and exchange of data over internet, uses **JavaScript**.
- **Web Development:**
  - Concentrate on learning and using techniques for developing how to make a website,
  - Build a web page portfolio, an e-commerce website, and many other tasks during the internship.

## Certification Courses:

- **Full-Stack Web Development:** - Course certified by **Udemy**,
- **Internet of Things:** - Course certified by **Internshala**.
